WACKER (www.wacker.com) is a globally operating chemical company headquartered in Munich, Germany. We are a leading manufacturer of a broad range of high quality materials for the cosmetics, human care, personal care industries and other key industries.

For bath, cleansing and sunscreen products for treating skin and hair through deodorants and most forms of color cosmetics like make-up, lipstick and mascara, WACKER materials and solutions add value to your products through technology and innovation.

Customized and comprehensive solutions for virtually all aspects of cosmetic applications are derived from our Wacker-Belsil® silicone based additives and CAVAMAX® cyclodextrin products.

For film forming, conditioning and thixotropic control, Wacker-Belsil® excels where innovative formulations are needed. CAVAMAX® cyclodextrins are the perfect solution for masking taste or odor, adding stability and delivering or solubilizing active ingredients.

Discover more about WACKER by visiting our website www.wacker.com. Contact Dr. Norbert Winkhofer or Dr. Mark Harrison at 800-942-0628 for more information.

WWW: www.schuelke-mayr.com

Schülke & Mayr has combined the unique skin-feel and deodorant properties of ethyl-hexylglycerin with the known antimicrobial and humectant benefits of caprylyl glycol. Sensiva® SC 10 is the latest development in a whole new way of looking at global preservation.

Tests show Sensiva® SC 10 significantly improves skin hydration. It can be used alone or in combination with traditional preservatives to maintain the microbiological stability of cosmetic products for the global market.

Sensiva® SC 10 joins Sensiva SC 50® (preservative enhancer and deodorant active) and our Euxyl® line of preservative blends.

Schülke & Mayr's specialist expertise help make preservation simpler. With Sensiva® SC 10, we make it global too.
