RED BOOK

How to Use the 2007/2008 Paint Red Book

Formulators and Suppliers to the Paint, Coatings, and Ink Industry

The Directory is divided into four sections:

1. Manufacturers

Paint and Coatings Formulators:

Alphabetical listings of Paint and coatings manufacturers with an indication of the type of products each formulates will be found in this section. Principal plant personnel are also shown.

Ink Manufacturers

This section represents companies that make inks. Listings include pertinent contact information and describe the markets they serve and the types of ink they make.

Brand Names

A section devoted to Paint and coatings brand names. Brand names have been restricted to those registered by prime formulators.

2. Independent Sales Agents

A listing of Independent Sales Agents covering the Paint, coatings and ink industry will be found in this section. Information includes company name, address, telephone and fax numbers, e-mail addresses, web sites, executives' names, product lines, companies represented and services provided.

3. Suppliers

Names and addresses for suppliers to the Paint, coatings and ink industry will be found in the section.

4. Suppliers by Product Category

Separate listings will be found for machinery and equipment, raw materials as well as consultants and testing laboratories, with companies providing these products or services listed alphabetically under the specific categories they supply.

Introduces new GEL-CEL W90

Interfibe Corporation, the leader in Cellulose Fiber innovation, highlights the newest product GEL-CEL W90 for thickening in a variety of adhesive & sealant applications. Most recently, Gel-Cel W90 has been approved as an aid to help extend neoprene in typical contact adhesive systems. For over 20 years, Interfibe has provided the Paint and Coatings industry with coarse, medium and fine cellulose fibers which are lightweight reinforcing functional fillers. Typical properties include increased tensile strength and reduced sag while improving coating consistency.

creating essentials

AEROSIL® fumed silica from Degussa enhances the manufacturing, quality and performance of paints, coatings (both powder and liquid), and other emerging dispersion technologies combining solids into liquids and liquids into other liquids.

The 100% amorphous character of Degussa's silicas dramatically minimizes environmental impact compared to other crystalline materials. Benefits of AEROSIL® hydrophilic and hydrophobic fumed silicas include:

- **Thickening and Thixotropy**
- **Scratch Resistance**
- **Free Flow and Anti-caking**
- **Dispersion Aid**
- **Anti-corrosion and Water Repellency**
- **Anti-sag and Anti-settling**
- **Emulsion Stability**

Degussa now offers many of our products in aqueous dispersion form. Please call us to discuss the use of AERODISP® in your paint and coatings formulations.

To find out more about Degussa's entire AEROSIL® portfolio of products for the coatings industry, visit us at www.aerosil.com or call 1-800-AEROSIL (237-6745).

ZERO VOC Preservatives & Additives

Troy Corporation sets the Gold Standard for material protection and performance - Environmentally friendly products designed to meet or exceed the toughest measures of compliance while improving performance:

- VOC-free biocides that set the standard for material protection in paint and coatings
- Zero and low VOC additives that maintain high performance with little or no contribution to VOC

THE CONN BLADE®

Patented blending/dispersing blade design makes radical improvement over old saw tooth designs

- * Most efficient and aggressive blending/dispersing blade available.
- * Provides proper combination of pumping action and shear/dispersion essential for fast consistent results.
- * Built in pumping action cuts processing time.
- * Longer life due to heavier gauge construction.
- * Less heat due to shorter required running time.
- * Excellent for high or low speed and high or low viscosity.
- * Supplied with hubs or mounting holes required to retrofit and upgrade present equipment.
- * Pumping blades without teeth are available and are excellent for gentle blending and agitation.
